

# TANU G M

AI/ML Engineer — Product-Minded Builder | Python · Data Analysis · Flutter · Growth Analytics

Bengaluru, Karnataka, India | +91-9844569161 | tanugm2003@gmail.com | [github.com/tanuguijar2](https://github.com/tanuguijar2) | [linkedin.com/in/tanu-guijar](https://linkedin.com/in/tanu-guijar)

## PROFILE

MCA candidate (AI, ML & Data Science, CGPA 8.9) with hands-on experience shipping a production Flutter app end-to-end and turning raw sales data into recommendations executives act on. Comfortable moving between code, dashboards, and stakeholder-ready documents — looking to bring that same build-and-analyze range to a growth or product role.

## SKILLS

**Languages:** Python, R, C, MATLAB, SQL

**Data & Analytics:** Data Cleaning, Predictive Modelling, Deep Learning, Market Basket Analysis, Power BI, Excel

**Web & Mobile:** React, Node.js, Flutter, Firebase, PHP, HTML/CSS, JavaScript, Figma

**Tools:** Git/GitHub, MySQL, Firebase Firestore, Google Colab/Jupyter

## EXPERIENCE

### Product Development Intern | REON Skills

Mar 2026 – Present

- Building a cross-platform Flutter app that helps farmers track and preserve a rare copper-red jackfruit species, from requirements through deployment.
- Designed UI/UX flows in Figma and implemented them pixel-perfect in Flutter, cutting design-to-build handoff friction for the team.
- Integrated Firebase Firestore for real-time data sync, powering live farm-activity updates and tree-tracking dashboards used directly by field staff.

## PROJECTS

### HerNest — Caregiver Support App for PCOS/PCOD | React Native

- Engineered a cross-platform mobile app in React Native to help caregivers, partners, and family members better understand and support women managing PCOS/PCOD.
- Designed an empathy-focused, user-centered UI/UX that translates complex health information into accessible educational content and caregiver guidance.
- Built symptom and mood-tracking modules enabling caregivers to identify patterns and respond proactively, addressing a real gap in caregiver-side health support.

### Growth Analysis — Jar (Digital Gold Savings App) | Python, Google Colab

- Analyzed category-wise, regional, and month-over-month sales trends in Python to uncover actionable growth opportunities from transaction data.
- Authored a stakeholder-ready product recommendation report, translating raw data analysis into clear, business-actionable insights.

### Market Basket Analysis | Power BI

- Conducted market basket analysis on transactional data to uncover customer purchase patterns and cross-selling opportunities.
- Built interactive Power BI dashboards visualizing frequent itemsets and promotional trends, supporting data-driven bundling and discount strategy.

### Task Management System | React, Node.js

- Built a full-stack task management web app with React and Node.js, implementing RESTful APIs for authentication and complete CRUD operations.
- Designed a responsive, mobile-friendly UI that streamlined task workflows and improved usability across devices.

### Cricket Academy Management System | PHP, MySQL

- Engineered a full-stack system in PHP and MySQL to manage player registration, attendance tracking, and fee payments for a sports academy.
- Automated report generation and structured relational database schemas, reducing manual admin workload and improving coach-to-admin communication.

## EDUCATION

**MCA — AI, ML & Data Science** | S-VYASA Deemed University | CGPA 8.9

2024 – 2026

**BCA** | SRS First Grade College, Chitradurga | CGPA 8.15

2021 – 2024

**12th (Senior Secondary)** | Don Bosco PU College | 74%

2021

**10th (Secondary)** | Don Bosco State School | 81%

2019

## CERTIFICATIONS

MERN Full Stack with AI — HSBC YUVA Program (2026) • Machine Learning Onramp — MathWorks (2024) • MATLAB Onramp — MathWorks (2024) • Python Programming — Infosys Springboard (2024)
